

Kseibi KAC 8-20 S Evaporative Air Cooler 20L 80W

Portable cooling with practical 20L capacity

Kseibi · 717910

Highlights

- 20L water tank supports longer use between refills
- 80W power rating for low-consumption operation
- Evaporative cooling for practical everyday comfort
- Portable floor-standing design saves space
- Smooth-rolling castors for easy repositioning
- Front grille directs airflow into the room
- Water level window allows quick tank checks
- Side ventilation panels support air circulation
- Suitable for workshops, garages and home areas
- Simple, clean housing for practical environments

Key Features

- 20L Water Capacity — The generous 20L tank helps reduce refill frequency, making the cooler more convenient for longer cooling sessions.
- 80W Low-Power Operation — With an 80W power rating, this unit offers an energy-conscious option for portable air cooling and circulation.
- Portable on Castors — The wheeled base makes it easy to move the cooler between rooms, work zones or wherever temporary airflow is needed.
- Visible Water Level Window — A front water level indicator lets you check tank status at a glance for easier day-to-day use.
- Compact Upright Format — Its vertical floor-standing design delivers useful cooling while keeping the footprint manageable in tighter spaces.
