

Kseibi 80L Air Cooler 250W

High airflow cooling for larger workspaces

Kseibi · 717925

Highlights

- 5500m³/h airflow for strong air movement
- 80L water tank supports longer operation
- 250W rated power for efficient cooling use
- Effective coverage for 40-60m² spaces
- Water consumption rated at 6-10L
- Portable floor-standing design with caster wheels
- Front grille helps direct cooling airflow
- Top control panel for simple operation
- Visible water level window for easy checking
- Suitable for workshops, garages and larger rooms

Key Features

- Strong Airflow Output — With 5500m³/h airflow, this air cooler is designed to move a substantial volume of air through the space for more noticeable cooling support.
- Large 80L Water Tank — The 80L tank is ideal for longer periods of operation, helping reduce how often the unit needs refilling during regular use.
- Efficient 250W Power Rating — Rated at 250W, it offers a practical balance between cooling performance and everyday energy use.
- Covers Larger Areas — Suitable for an effective area of 40-60m², making it a good fit for workshops, commercial spaces and larger indoor zones.
- Portable and Easy to Position — The wheeled floor-standing body is easy to move, allowing you to place cooling where it is most useful across changing work areas.

Specifications

Mobility	Caster wheels
Control location	Top-mounted
Water level indicator	Visible window

Specifications by Variant

Specification	717925
Airflow(m3/h)	5500m ³ /H
Rated power	250 W
Water tank Capacity	80 L
Effective Area	40-60m ²
Water consume	6-10 L
