

Kseibi KAC 38-70 M Portable Evaporative Air Cooler 70L 380W

Mobile evaporative cooling for hardworking spaces

Kseibi · 717950

Highlights

- 70L water tank for extended cooling use
- 380W power rating for practical evaporative cooling
- Portable upright design saves floor space
- Four caster wheels for easy repositioning
- Large front grille supports strong airflow delivery
- Side ventilation panels aid air circulation
- Simple top-mounted control panel
- Suitable for workshops, warehouses and garages
- No fixed installation required
- Built for flexible cooling in changing work areas

Key Features

- Portable site-ready design — The upright cabinet and four caster wheels make it easy to move the cooler to the area that needs airflow most.
- 70L water tank — Large tank capacity supports longer operating periods and reduces the need for frequent refilling during use.
- 380W evaporative cooling power — Designed to provide effective water-based cooling support for working environments without permanent air conditioning.
- User-friendly controls — A simple control panel at the top front keeps operation straightforward and easy to access while the unit is in place.
- Workshop-friendly airflow layout — The large front grille and side ventilation panels are designed to promote consistent air movement in active spaces.
