

Kseibi Red Acrylic Film Tape 1mm x 3cm x 10m

Clean bonding for everyday fixing jobs

Kseibi · 882240

Highlights

- Acrylic film tape for clean, consistent bonding
- 1mm thickness for a defined adhesive layer
- 3cm width covers trims, panels and fittings
- 10m roll length for multiple applications
- Red roll is easy to identify in the workshop
- Suitable for mounting, fixing and joining tasks
- Cuts to length for precise application
- Neat alternative to messier liquid adhesives
- Compact roll stores easily in toolboxes
- Useful for DIY, trade and general repair work

Key Features

- Acrylic Film Construction — Designed as an acrylic film tape for clean handling and an even bonding layer across the application area.
- 1mm Thick Profile — The 1mm thickness provides a consistent tape body for mounting and fixing jobs that need uniform contact.
- Practical 3cm Width — Wide enough for general bonding tasks on trims, panels and other flat contact surfaces.
- 10m Roll Length — Supplied in a 10m roll to give you useful coverage for repeated workshop, site or home projects.
- Easy Workshop Use — Simple to cut, position and store, making it a convenient option for quick repairs and installation work.
