

Kseibi Single-Filter Chemical Respirator

Compact respiratory protection for practical chemical work

Kseibi · 901060

Highlights

- Single-filter respirator for practical respiratory protection
- Lightweight plastic construction for easier wear
- Covers nose and mouth for focused breathing protection
- Front-mounted filter keeps the profile compact
- Adjustable elastic straps help provide a secure fit
- Suitable for paint, chemical and workshop environments
- Shaped facepiece supports stable day-to-day use
- Durable body designed for routine work applications
- Box packed for convenient storage and supply
- Kseibi safety gear for professional and DIY tasks

Key Features

- Single-Filter Configuration — The single-filter design provides a compact, straightforward setup that is easy to handle and suited to regular workshop and maintenance tasks.
- Lightweight Plastic Body — Made from plastic, the respirator keeps weight down while offering the durability needed for repeated use in working environments.
- Secure Head-Strap System — Adjustable elastic straps wrap around the head to help keep the mask in place while you move, work and reposition.
- Full Nose-and-Mouth Coverage — The facepiece is shaped to cover the nose and mouth area, supporting more focused respiratory protection during chemical and paint-related jobs.
- Practical Boxed Packing — Supplied in box packing for easier storage, handling and distribution as part of workshop, site or safety-room supplies.
